The Journal of the American Medical Association Jama, Roxanne K. Young : A Piece of My Mind (Jama Archives Journals) before purchasing it in order to gage whether or not it would be worth my time, and all praised A Piece of My Mind (Jama Archives Journals):

2 of 2 people found the following review helpful. heartwarming and soul-piercingBy Penny ElginThis book is a collection of essays written through multiple viewpoints by people involved with the medical system -- doctors, nurses, patients, even the relatives of patients. It will make you understand more fully how, for so many in medicine,

their hearts and minds are part of their decisions. It sometimes shows regrets. It ultimately shows their humanity, our humanity as we partake of their skills, and the blessing upon all of us that they serve us the way they do. 1 of 1 people found the following review helpful. Almost as good as the first one
By G. D. Nulton
I bought this after looking for a copy of the original edition of *A Piece of My Mind*, published in the late '80's. This one is a little different, and really shows the changes in training and practice that occurred since the last one came out. (I graduated from Med School in 1984 and the first one could have been written by me and my cohorts.) Still excellent, and well edited. 2 of 2 people found the following review helpful. From the heart.
By R. Weiss
A very feeling set of essays. I would love to have fifteen minutes' conversation with some of these physicians. I am sure I could learn much.

reflections and insights on health, disease, and healing
Now in paperback for the first time, *A Piece of My Mind* brings together revealing personal essays that first appeared in *The Journal of the American Medical Association (JAMA)*. These engrossing, moving vignettes--written by physicians, patients, family members, medical students, and others--offer a unique glimpse into the everyday experiences and relationships in the medical world. Baring their souls and opening their hearts, the authors share their most personal moments, stories, and observations. You'll hear from the intern who could not hide her emotions, earning reprimand from her supervisors but appreciation from her patients . . . meet an alcoholic whose indomitable spirit helped her defy all the odds . . . experience the heartbreaking comedy of a Monday morning HIV clinic . . . be inspired by the oncology social worker who found a new love of life during her own struggle with breast cancer . . . and learn from the physician who realized that by witnessing her patients' courage she became a better physician. Compelling, touching, and at times humorous, *A Piece of My Mind* offers a deeper understanding of physicians, patients, medicine, and the simple human act of helping another person. "These stories, based in science, are transmitted to readers . . . after filtering through a human heart . . . consistently succeeds in bridging science and the humanities."--William H. Foege, MD, Emory University

"Bridge(s) the gap between science and the humanities and look(s) at human experiences with disease, healing, violence, heartbreak and death."
