Bradley S. Bowden, Joan M. Bowden : An Illustrated Atlas of the Skeletal Muscles before purchasing it in order to gauge whether or not it would be worth my time, and all praised An Illustrated Atlas of the Skeletal Muscles:

2 of 2 people found the following review helpful. HorribleBy Melissa Cantey Absolutely insane pricing. \$50-60 for paper I have to put in a binder? I know there's licensing, but I pay this for a book that already comes bound. If they're really trying to save students money, sell an e-copy for \$15 that students can print at home or copy max. Copyright laws allow educational use. This ticks me off how students are being taken advantage of for required materials. Other books generally don't cost this much, either do not in demand texts. 1 of 1 people found the following review helpful. Book information is WONDERFUL! It gives great detail about every muscle and ...By Kimberly G. Book information is WONDERFUL! It gives great detail about every muscle and bone. Very pleased with the information and pictures. However, the pages are super thin including the cover page. A book this good should have better quality paper to be 3 ring punched and loose page! 0 of 0 people found the following review helpful. Knowing where muscle attachments were on the bones helped me identify bones easily during practicals By Jenny This really helped for my osteology class. Knowing where muscle attachments were on the bones helped me identify bones easily during

practicals. I highly recommend this book for classes such as osteology or anatomy and physiology.

An Illustrated Atlas of the Skeletal Muscles is designed as a functional reference, supplement, and study guide for students and health professionals with a broad diversity of interests in the normal structure and function of skeletal-muscular systems. This new edition full-color Atlas features over 400 illustrations of muscles, functional muscle groups, bones, articulation, muscle innervation pathways, joints, and youth sports injuries. Loose-leaf, 3-hole drilled, full-color.
