This essential primer is a print companion to Anderson's Electronic Atlas of Hematology and Anderson's Electronic Atlas of Hematologic Disorders. With four-color illustrations, this manual describes and identifies the maturation

sequence of developing blood cells, as well as categorizing cell abnormalities. Coverage includes both normal and abnormal cells, and the format allows for benchtop reference. Written by a well-known educator in the field, this text follows the CLS Body of Knowledge curriculum for MTs and MLTs.
