When I contacted the company they offered a refund but I needed the book for classes and it is not an easy used book to find. I asked for the CD but they didn't have it, then I asked a discount coupon or something but they only offer an apology and a refund. I think they should be more careful and check what they are selling because it can be misleading to customers. I am very disappointed and would never buy again from this seller.0 of 0 people found the following review helpful.
