**Robert Christenson, Linda Gregory, Lisa Johnson, Gershon Shugar, B.S. John E Hutton III, MT Lisa J. Johnson MHS, University of Maryland Medical System, Baltimore, Maryland Robert Christensen Ph.D. :** **Appleton Lange's Outline Review Clinical Chemistry** before purchasing it in order to gage whether or not it would be worth my time, and all praised Appleton Lange's Outline Review Clinical Chemistry:

6 of 6 people found the following review helpful. AppletonLange's Outline Review Clinical ChemistryBy Alexandra BelousTo my opinion this is a very good review of clinical chemistry course. Every section has questions at the beginning and at the end, helping to get concentrated on the most important topics. Good language, thoughtful tables and figures helping to summarize and memorize most essential material. All test procedures described briefly, but good enough to understand the principles and methodology of every single laboratory test. Not too much "watery" text

saving time for the study. I really enjoyed this review and hope it will help me to pass my certification exam. 0 of 0 people found the following review helpful. One Star By Ulla Khknen Print quality is not good 4 of 4 people found the following review helpful. passed the C ASCP By Andrew Passed the C ASCP with a 646 score in Sept 2011 using this book! A must have! Easy to follow format and BOC like questions

This is the first book in a series that serves the dual purpose of preparing students of CLS programs for certification exams and giving cross training skills to established clinical lab scientists who now find themselves called on to work in other areas of the lab. This book uses a building block approach to convey the material in a logical fashion. Starting with an overview of medicine and the medical laboratory's relationship, the text proceeds to the diagnostic value of those analytes normally associated with clinical chemistry, on to technologies of analysis, quality assurance, and statistical analysis of laboratory data. AL Outline Review of Clinical Chemistry makes it easy to optimize your study sessions and use your time efficiently, and helps you quickly locate key concepts. This PREP guide provides pretests to help you identify areas for extra attention, and gives you what you need to know in an easy-to-remember format, packed with study-enhancing devices such as illustrations and learning objectives.

From the Back Cover The Outline that delivers... \* Quickly locate key concepts \* Identify areas for extra attention \* Rapid-access format facilitates efficient study \* Includes valuable illustrations and learning objectives The most complete and effective review of clinical chemistry available \* Introductory outlines, objectives, and pretests \* Self-test questions for evaluating strengths and weaknesses \* Many CLS-type multiple-choice questions \* Ideal review for courses and the CLS exam About the Author McGraw-Hill authors represent the leading experts in their fields and are dedicated to improving the lives, careers, and interests of readers worldwide McGraw-Hill authors represent the leading experts in their fields and are dedicated to improving the lives, careers, and interests of readers worldwide McGraw-Hill authors represent the leading experts in their fields and are dedicated to improving the lives, careers, and interests of readers worldwide
