I should have read this, skipped class, and learned business By A Customer At first I thought this was too much information, then I realized it was everything I needed to know for my clinical studies as well as my academic studies. It is hard to understand how this book was written by doctors. I think professional editors would have a hard time negotiating this level of complexity. You both made it look simple and easy to follow. The amount of organization it contains is awesome. I am finishing up school now, and I only have one complaint about this text. It should've been handed out to the students on the first day of class with a schedule of which sections to learn for each year of study. It should be a required text for everyone. My life, my family, and my peers all would have benefitted from the decreased stress associated with a properly organized course plan. I probably

could have saved thousands on coffee and actually slept instead of cramming this information for hours on end. This is an entire education between two covers. Thank you, thank you, thank you. My younger brother starts school in September and he is studying this book already! His life will be so much simpler because of it. I not only studied this material for boards, but due to the ease of which it is laid out I actually had time to learn it. You should write a business text next!

3 of 3 people found the following review helpful. A great book, but not for Part IV  
By George Washington  
I agree that this book is a great asset, and would recommend it to anyone in Chiropractic school, having previously stipulated that it will not prepare you for part IV. The book does indeed review Part III in great detail, but the part four review - with the exception some medical stuff, abdominal exam, thorax, etc. and some others, does not fully prepare you for Part IV. I found the last section on technique extremely lacking, there were no pictures, and very little on the method with which National Boards test you on (vertebral malposition listings [national listings]) since most of us were taught Gonstead (at least at Life West). In conclusion, I recommend the Irene Gold review seminars. They may help more than this book will. It is a great book, but let's be real here, with the expense of Part IV National Boards (\$850), it is cheaper not to buy this book and go to a review and get a passing grade, than to save in the beginning and fail the exam. That's the opinion of someone who used this book and studied in detail and failed the first time around.

4 Stars!  
0 of 0 people found the following review helpful. Good review for boards  
By A Customer  
I found this book to be pretty good review for Part III. It helped with summarizing all the stuff I learned in chiropractic school. It gave good reviews of the clinical impression or diagnosis, physical examination, neuro examination, etc. I also used the following which was just awesome for showing me the type of questions to be prepared for on the Part III and Part IV chiropractic Boards:  
National Board of Chiropractic Part III Study Guide: Key Review Questions and Answers with Explanations by Patrick Leonardi  
National Board of Chiropractic Part IV Study Guide: Key Review Questions and Answers (Volume 1) and (Volume 2) by Patrick Leonardi.  
In fact, Dr. Patrick Leonardi's and Dr. Jeannette Gibson's study guides helped me to pass the boards. I advise getting these four study guides. It's better than taking these boards over again.

Section I contains eight clinical study chapters providing explanations of all the topics covered in Part III of the Boards. Section II guides the student through the demonstration and verbalization of exam procedures.

From the Back Cover  
Key Benefit: Written by students for students, this generously illustrated book is an extremely practical review tool  
Key Topics: The book is divided into two sections. Section I contains eight clinical study chapters which provide concise explanations of all the topics covered in part III of the boards. Section II of the book gives an overview of all topics in part IV of the exam.  
Market: Chiropractic students.
