Charles Odwin : Appleton Lange's Review for the Ultrasonography Examination (A L's review series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Appleton Lange's Review for the Ultrasonography Examination (A L's review series):

This illustrated, self-examination review contains more than 2000 board-type questions and covers the four major areas of ultrasound: physics, abdominal, obstetrics and gynaecology and neurosonology. Explanatory answers for each question, study guides summarizing important concepts, and references are found at the end of all four speciality

examinations. Instructions for timing the exams, scoring answers, and a chart for recording progress are also included. This new edition features mostly multiple-choice questions with illustrations and many more sonograms for the reader to identify, plus an expanded section on physics and a modified gynaecology section.
