Excellent Coding Text for The BeginnerBy Michelle RimmerI LOVE this book! I am an instructor and president of an online medical billing training website. I taught a CPT coding class last year, and the book the school required was horrible- I wished I had been able to use this worktext for the course!! Now that I have opened my own online training site, I am able to use this text for our 'CPT and ICD-9 Coding for the Medical Biller' course! It is an excellent text for an introductory course! Instructors, if you find your students are struggling with the current text you use---get a copy of this--you'll be so glad you did!

This book gives instruction on how to use an encoder product "on the job" in a medical office setting. While there is

discussion of how to code manually, the focus is on the use of encoder software. Screen shots from encoder product provide visual examples throughout the text, and exercises using the encoder software appear throughout the text. This text includes a free trial CD of EncoderPro by Ingenix.

Chapter 1: Introduction to EncoderPro Chapter 2: CPT Evaluation Management Coding Chapter 3: Anesthesia Chapter 4: Surgery Chapter 5: Radiology Chapter 6: Pathology and Laboratory Chapter 7: Medicine Coding Chapter 8: ICD-9-CM Coding Chapter 9: HCPCS Coding Chapter 10: ICD-9-CM Classification of External Causes of Injury/Poisoning Chapter 11: Reimbursements
