**From Churchill Livingstone : Assessment of the Lower Limb, 1e** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Assessment of the Lower Limb, 1e:

This is a guide to the examination and assessment of the lower limb to facilitate accurate diagnosis and the planning of appropriate treatment. It should help the student develop an accurate picture of the state of lower limb viability and limb function; to arrive at a precise and accurate diagnosis; and to identify additional factors which may influence treatment. A section on different patient groups helps the student relate the principles they have learned to actual clinical situations. In addition, a list of references suggests ways for the student to follow up other avenues of study.
