Jay P. Goldsmith MD, Edward Karotkin MD FAAP : Assisted Ventilation of the Neonate, 3e (In practice handbooks) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Assisted Ventilation of the Neonate, 3e (In practice handbooks):

12 of 12 people found the following review helpful. A feast on neonatal ventilation By dr. sangita trivedi I do not think if any other book has covered neonatal ventilation the way this one has. It is an essential item for every doctor caring for the newborn. There is no need to look forward to any other publication on this subject. It has dealt with every aspect of neonatal ventilation so well that it has become a gold standard.

Designed to be a working guide, this text provides comprehensive coverage of all aspects of assisted ventilation. Includes chapters on control of ventilation, specialized ventilator techniques and modalities, and exogenous surfactant therapy. Pulmonary management techniques such as liquid ventilation and nitric oxide are also discussed. Ventilatory

management case studies test diagnostic and clinical abilities with problems drawn from actual clinical files!
