**Jay P. Goldsmith MD, Edward Karotkin MD FAAP : Assisted Ventilation of the Neonate, 4e** before purchasing it in order to gage whether or not it would be worth my time, and all praised Assisted Ventilation of the Neonate, 4e:

Authoritative experts cover all aspects the basic science and management of neonatal pulmonary care including complications, nutrition, transport, outcomes, follow-up, and parental education. This state-of-the-art 4th Edition presents chapters on control of ventilation, specialized ventilator techniques and modalities, exogenous surfactant therapy, and includes new chapters on ventilatory strategies, nitric oxide, and the ethical considerations of assisted ventilation. Ventilatory management case studies test diagnostic and clinical abilities with problems drawn from actual clinical files. The Fourth Edition presents new chapters on: control of ventilationspecialized ventilator techniques and

modalities exogenous surfactant therapy ventilatory strategies nitric oxide the ethical considerations of assisted ventilation
