**Kim Steele, Sherry Ahrentzen : At Home with Autism: Designing Housing for the Spectrum** before purchasing it in order to gauge whether or not it would be worth my time, and all praised At Home with Autism: Designing Housing for the Spectrum:

0 of 0 people found the following review helpful. Fantastic book. A great subject addressed and extremely well ...By Naresh AlrejaFantastic book. A great subject addressed and extremely well researched. Surprisingly no one till date had addressed this Subject.0 of 1 people found the following review helpful. Black and white illustrations are disappointing.By CustomerGreat info - but all images inside are black and white - including diagrams etc. the illustrations are not in colour. There was no mention of this on ...

At Home with Autism offers a close look at current practices for designing housing that will support the needs and aspirations of people with autism, and it mounts a powerful case that there should not be a singular residential model or approach. Rather, the authors argue, residential design for autism should be flexible and varied, focused on quality

of life and the expansion of residential choices for people on all parts of the autism spectrum.

"Anyone seeking to create a home for an adult on the autism spectrum needs to read this book. Steele and Ahrentzen combine their extraordinary understanding of autism and design to provide a clear guide for crafting living environments that respond to the unique individual needs of those with ASD."
