Robert Cooper, Stephen Allwright, Jock Anderson : Atlas of Nuclear Imaging in Sports Medicine before purchasing it in order to gauge whether or not it would be worth my time, and all praised Atlas of Nuclear Imaging in Sports Medicine:

0 of 0 people found the following review helpful. Invaluable By Steven Rome Have been using it for over a decade and always have it within arm's reach. 0 of 0 people found the following review helpful. An Excellent Window into a Difficult Subject By Michael Burdette I am a sports physician and I cannot recommend this "Atlas of Nuclear Imaging" enough. Through the use of clinical case studies, this very well set out manual has been of enormous assistance not only in my practice but for the many fellow physicians and sports trainers I have told about it. I have observed and (happily) participated in many dramatic turnarounds in the health of several patients, whose diagnoses might have

otherwise escaped me. This is an outstanding book!0 of 0 people found the following review helpful. An Excellent Window into a Difficult SubjectBy A CustomerI am a sports physician and I cannot recommend this "Atlas of Nuclear Imaging" enough. Through the use of clinical case studies, this very well set out manual has been of enormous assistance not only in my practice but for the many fellow physicians and sports trainers I have told about it. I have observed and (happily) participated in many dramatic turnarounds in the health of several patients, whose diagnoses might have otherwise escaped me. This is an outstanding book!

A unique anatomical guide to nuclear sports medicine. This practical, quick reference includes detailed technique tips and 600 normal and abnormal images. Perfect for physicians, nuclear medicine specialists, or orthopedic surgeons to use when treating sports injuries.

"This is a concise and comprehensive atlas of scintigraphic images of sports injuries. The book is well laid out with discussions of the pathologic process followed by relevant nuclear images as well as radiographic studies." "This atlas would make an excellent reference for those who will be involved with nuclear studies as they pertain to sports injuries. There are few books that focus on this subject in such a comprehensive yet concise and easily referenced style." "4 stars" (Doody's 2003-11-21)About the AuthorRobert Cooper, FRACP, DDU, is a staff physician in nuclear medicine at the Royal North Shore Hospital in Sydney, Australia. He also works in private practice at the Mater Misericordiae Hospital and at Dee Why Nuclear Medicine also in Sydney. He is a fellow of the Royal Australasian College of Physicians and holds a Diploma of Diagnostic Ultrasound. As part of his Nuclear Medicine training, he completed a fellowship at the University of Michigan. Stephen Allwright is a consultant in nuclear medicine at Mater Misericordiae Hospital and at Dee Why Nuclear Medicine in Sydney and is a fellow of the Royal Australasian College of Physicians. He completed his nuclear medicine training with a fellowship at the Childrens Hospital of Los Angeles and holds a Diploma of Diagnostic Ultrasound. Jock Anderson is a radiologist specializing in sports medicine imaging. He is MIA Associate Professor at the University of New South Wales in the Sports Medicine Program and consultant for the MIA Group. He was Director of Medical Imaging at the Sydney 2000 Olympics and will be Coordinator of Medical Imaging for the Rugby World Cup 2003. He has authored two previous books on sports medicine imaging.
