Serge Tixa : Atlas of Surface Palpation: Anatomy of the Neck, Trunk, Upper and Lower Limbs, 3e before purchasing it in order to gage whether or not it would be worth my time, and all praised Atlas of Surface Palpation: Anatomy of the Neck, Trunk, Upper and Lower Limbs, 3e:

0 of 0 people found the following review helpful. A wonderful book for anyone interested in the musculoskeletal systemBy George H. SutherlandA wonderful book for anyone interested in the musculoskeletal system, including orthopedic surgeons, orthopedic surgery residents, medical students, physical therapists, etc.

Serge Tixa presents in this highly popular book a method of palpatory anatomy called Manual Exploration of Surface Anatomy (MESA). MESA locates anatomical structures important to clinical examination allowing careful selection

of the most appropriate manual therapy technique or manoeuvre. The new edition presents precisely and visually the various anatomical structures with the help of more than 130 colour illustrations and close to 900 black and white photographs. For every photograph showing an anatomical structure accessible to palpation, a model whose physique shows the structure clearly has been chosen. Each chapter has up to four subsections, treating the various aspects of each body region. These cover osteology, myology (musculotendinous structures), arthrology (joints and ligaments) and lastly nerves and blood vessels. Each photograph is carefully presented and accompanied by a section of text describing the method of approach to finding the structure concerned. Whenever necessary, reminders, essential for the proper use of the methods of approach (attachments, actions and innervations) are included. Clinical notes highlight the link between palpation and clinical diagnoses. Atlas of Surface Palpation: Anatomy of the Neck, Trunk, Upper and Lower Limbs is aimed at students and practitioners who need a method of applied anatomy in their practice. All new artwork programme enhances accessibility and learning Useful template approach aids ready understanding and allows the reader to go at his or her own speed Presents almost 600 photographs and line artworks to render the learning experience as easy as possible Contains over 160 pull out boxes to act as useful aide memoires Clinical Hints and Tips boxes indicate points of relevance for the clinic Methods of approach illustrated with many new photographs Anatomical drawings have been completely redesigned to improve clarity Clinical Notes boxes Glossary Inclusion of Dermatomes

About the Author Serge Tixa est cadre formateur en écoles d'ostopathie, chiropraxie et kinsithrapie. Il est également chargé de cours à l'école d'ostopathie de Lyon (ATSA) pour les formations initiales et en alternance ainsi qu'à l'institut d'ostopathie (IFKO) et à l'institut de masso-kinésithérapie (IFMK) de Montpellier.
