Prior to purchasing the cd's, I had completed approximately 1/3 of the course and I felt overwhelmed by the amount of material. Listening to the tapes while driving 45 minutes to work, really helped me to memorize the medical terminology and to put everything into perspective. I had considered dropping from the course but these cd's helped me organize the material and I feel more confident that I will pass the state practical and written test. THANK YOU SO MUCH for offering this EXCELLENT AUDIO PROGRAM !!!!!1 of 1 people found the following review helpful. Would have given 5 stars but...By NY McGuiverThe audio lectures are great. Easy to listen to in the car and elsewhere. love the fact that they don't seem to be reading from a script. they are pretty dynamic. However, (the fifth star), I got the first copy and the disc labeled disc 2 had disc 3's audio on it. No disc 2 in the set. I got a replacement from pearson directly shipped overnight (great

customer service). It had the same exact issue. I am awaiting my third set from the seller. I will update if the issue is resolved. otherwise its a great adjunct to the text and live lectures and utilized my driving downtime.anyone else have this issue?1 of 1 people found the following review helpful.
