Steven Kramer : Audiology: Science To Practice before purchasing it in order to gage whether or not it would be worth my time, and all praised Audiology: Science To Practice:

Distilled here is the experience, expertise, and, most of all, the knowledge of what students need to complete successful study in undergraduate audiology and speech-language pathology courses, or to gain a grounding in the subject when embarking on an AuD program. Steven Kramer has taught an introduction to audiology course for 20 years, and has truly designed this text with students in mind, providing a balanced coverage of the subject that is consistent with the material necessary for an introductory course. His book presents a comprehensive and challenging coverage of hearing science and clinical audiology, written in a style that makes new and difficult concepts easy to

understand.
