Steven Kramer, Lesli Guthrie : Audiology Workbook before purchasing it in order to gauge whether or not it would be worth my time, and all praised Audiology Workbook:

The workbook has activities and questions designed related to concepts and procedures traditionally covered in introductory hearing science and clinical audiology courses. This workbook is designed for undergraduate students in speech and hearing and students beginning graduate studies in audiology. The workbook includes activities such as drawing labeling diagrams, drawing waveforms, calculating frequencies/periods, amplitudes, and phases, interpreting audiograms, speech tests, tympanograms, acoustic reflexes, and auditory brainstem responses. There are also questions to reinforce knowledge about hearing disorders, as well as basic understanding of hearing aids and their fittings.

About the Author Steven Kramer, Ph.D., is a Professor in the School of Speech, Language, and Hearing Sciences at San Diego State University, where he has been a faculty member since 1985. He is also the Co-Director of the Audiology Doctoral (Au.D.) Program offered jointly by San Diego State University (SDSU) and the University California San Diego (UCSD). Dr. Kramer served as the department chair from 1990-2001. He obtained his masters and doctoral degrees in audiology and hearing science from the University of Florida.
