It was a new book and it looked as perfect as one would want. It came days before it was due which was great because I needed it asap. Wonderful TextBy LisaDAs a graduate student I am told to buy text for class, which I typically start reading for the first few weeks and give up because the text is too confusing, repetitive, long, etc. This is the first text that I actively read every page assigned. The citations are incredible as is the information. The authors get right to the point and move on, they don't take pages to explain topics unless it is necessary. I suggest this for anyone interested in AAC or working with the population as a reference.0 of 0 people found the following review helpful.
