Raymond H. Hull : Aural Rehabilitation: Serving Children Adults before purchasing it in order to gage whether or not it would be worth my time, and all praised Aural Rehabilitation: Serving Children Adults:

1 of 1 people found the following review helpful. Phew, tough readBy S. CallawayThis book is a good and comprehensive guide to rehabilitation. However, it is boring and the layout is very unappealing. I am the type of person who considers a lot of the book content to be common sense and I lose interest when reading it. But nothing in the book is wrong or unnecessary, it is just not appealing to the way my mind works. I used it in my courses and it is sitting on my shelf, however, I have not used it since I took the related courses.

This perennial favorite once again emphasizes the importance of treating the whole person, not just the hearing impaired. Written for students in aural rehabilitation courses, the fourth edition combines previously separated chapters with updates throughout for a more cohesive treatment of aural rehabilitation practices with children through older adults. New technology and treatment considerations are included to provide students with a broad and forward-

looking perspective on aural rehabilitation.

About the Author Professor of Communicative Disorders and Sciences, Audiology, Wichita State University, Wichita, Kansas. An ASHA Fellow since 1978, and Fellow of AAA, he holds dual certification in audiology and speech-language pathology. Dr. Hulls awards include Distinguished Scholar, University of Northern Colorado; Distinguished Pioneer In Gerontology by the Colorado Gerontological Society; the U.S. Public Health Service Award; the Red River Award by the Winnepeg, Manitoba League for the Hard of Hearing; Emery Lindquist Faculty Award; among others. He serves as consultant and advisor to most Federal agencies that support programs in communication disorders. He is author of *Hearing In Aging*, published by Singular Thomson Learning.
