From BiblioGov : Baseline Human Health Risk Assessment for the Ogden Railyard Site Ogden Utah Final before purchasing it in order to gage whether or not it would be worth my time, and all praised Baseline Human Health Risk Assessment for the Ogden Railyard Site Ogden Utah Final:

The U.S. Environmental Protection Agency (EPA) was introduced on December 2, 1970 by President Richard Nixon. The agency is charged with protecting human health and the environment, by writing and enforcing regulations based on laws passed by Congress. The EPA's struggle to protect health and the environment is seen through each of its official publications. These publications outline new policies, detail problems with enforcing laws, document the need

for new legislation, and describe new tactics to use to solve these issues. This collection of publications ranges from historic documents to reports released in the new millennium, and features works like: Bicycle for a Better Environment, Health Effects of Increasing Sulfur Oxides Emissions Draft, and Women and Environmental Health.
