Kelvin Wakefield SMC(Tech) : Bennett's Ophthalmic Prescription Work, 4e before purchasing it in order to gage whether or not it would be worth my time, and all praised Bennett's Ophthalmic Prescription Work, 4e:

All too often the technical jargon and mystery surrounding various manufacturing processes can seem daunting at best and confusing at worst. However, this practical and down-to-earth book aims to demystify manufacturing optics, taking the subject out of its academic ivory tower and putting it firmly where it belongs in the real world of the

industry, workshop and the clinic. Prepared by an optical technician with extensive teaching and practical experience, Kelvin Wakefield has written text in a clear and approachable style, avoiding formulae or technical jargon. This classic text will continue to be a valuable introduction for everyone entering the field of retail and manufacturing optics including dispensing opticians, optical assistants, technicians and receptionists. Completely updated, revised and rewritten. New edition features new information on lens coatings, standards, manufacturing processes and raw materials, frames and frame materials. Revision tips and advice included.

'As a basic, understandable, guide it is unique and Wakefield has faithfully maintained Arthur Bennett's clarity, precision and readability ... certainly for all concerned with ophthalmic prescriptions this handy book is invaluable.' Professor Robert Fletcher, *Optical World*. From the Publisher. Bennett's Ophthalmic Prescription Work describes in straightforward terms the theory, manufacturing process and prescription of spectacle lenses and frame materials. It serves as an ideal introduction to ophthalmic prescription work for those working in the industry. All too often the technical jargon and mystery surrounding various manufacturing processes can seem daunting at best and confusing at worst. However, this practical and down-to-earth book aims to demystify manufacturing optics, taking the subject out of its academic ivory tower and putting it firmly where it belongs in the real world of the industry, workshop and the clinic. Prepared by an optical technician with extensive teaching and practical experience, Kelvin Wakefield has written text in a clear and approachable style, avoiding formulae or technical jargon. This classic text will continue to be a valuable introduction for everyone entering the field of retail and manufacturing optics including dispensing opticians, optical assistants, technicians and receptionists. About the Author: SMC (Tech), Technical Support Manager, Signet Armorlite Europe, Manufacturing Opticians, Gloucester, UK (formerly Group Training/Safety Officer, Norville Optical Company Limited, Gloucester, UK).
