**The International Agency for Research on Cancer : Betel-quid and Areca-nut Chewing and Some Areca-nut-derived Nitrosamines (IARC Monographs on the Evaluation of the Carcinogenic Risks to Humans)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Betel-quid and Areca-nut Chewing and Some Areca-nut-derived Nitrosamines (IARC Monographs on the Evaluation of the Carcinogenic Risks

to Humans):

This monograph evaluates the evidence of carcinogenicity of Betel-quid and Areca-nut chewing as well as some areca-nut-derived nitrosamines.

About the AuthorThe International Agency for Research on Cancer (IARC) is part of the World Health Organization. IARC's mission is to coordinate and conduct research on the causes of human cancer, the mechanisms of carcinogenesis, and to develop scientific strategies for cancer control. The Agency is involved in both epidemiological and laboratory research and disseminates scientific information through publications, meetings, courses, and fellowships.
