Sioban Nelson, Maria Tassone, Brian D. Hodges : Creating the Health Care Team of the Future: The Toronto Model for Interprofessional Education and Practice (The Culture and Politics of Health Care Work) before purchasing it in order to gage whether or not it would be worth my time, and all praised Creating the Health Care Team of the Future: The Toronto Model for Interprofessional Education and Practice (The Culture and Politics of

Health Care Work):

2 of 2 people found the following review helpful. Pass...By CustomerThis book is so basic that I didn't use it for my publication. The future of healthcare is in the past for this one!0 of 0 people found the following review helpful. Good summary of issues at undergraduate university levelBy Dr. Curtis SMithAddresses a world-class case of conversion to interprofessional health care training at the pre-licensure level. Good reference list. Fair examples0 of 0 people found the following review helpful. Incredible book that is user friendly!By Julie FairmanThe authors of the book have created a well-structured and highly useable volume. Based on the highly successful IPE model at the University of Toronto, this book provides both the intellectual rationale and the building blocks for developing an IPE program. The book is framed by a case study approach and offers reflection questions for users to ponder their own context for IPE as well as the resources they will need to design, develop and implement an IPE program. I highly recommend this book to be use by professional programs across many levels.

One way to significantly improve the delivery of health care is to teach the health professionals who provide care to work together, to communicate with each other across professional boundaries, and to start to think and act like a team that has the patient at its center. The team-based care movement is at the heart of major changes in medical education and will become an element in the new accreditation standards. Through its Centre for Interprofessional Education, the pioneering approach in this area taken by the University of Toronto has attracted international attention. The role of the Centre for IPE, a formal partnership between the University of Toronto and the Toronto Academic Health Sciences Network, is to create a hub for the university and the many teaching hospitals where all core parties can be actively engaged in redesigning this new model of health care. In *Creating the Health Care Team of the Future*, Sioban Nelson, Maria Tassone, and Brian D. Hodges give a brief background of the Toronto Model and provide a step-by-step guide to developing an IPE program.

"The real value of this book is as a highly practical guide for those individuals and organizations who are committed to making interprofessional education a reality. In addition to professional educators, leaders of health care systems themselves can learn from this book as they work to transform their structures and cultures to support teamwork around patients at the point of care, ideally reinforcing what new hires are learning in well-designed interprofessional education programs, rather than starting from scratch." Jody Hoffer Gittel, ILR Reivew (August 2016) "Once again, the educational team from the University of Toronto is providing cutting-edge work. With interprofessional education and care sweeping across the United States, academic programs will be looking for a resource such as this to provide guidance for building their educational models. The quality of this work is outstanding. The authors combine up-to-date IPE scholarship with practical content expertise that will assist educators as they forge new IPE curricula and collaborative care learning opportunities for health profession students and clinicians alike."Richard D. Kiovsky, Indiana University School of MedicineAbout the Author Sioban Nelson is the Vice-Provost Academic Programs, University of Toronto. She is coauthor of *Creating the Health Care Team of the Future* and coeditor of *Complexities of Care: Nursing Reconsidered* and *Notes on Nightingale: The Influence and Legacy of a Nursing Icon*, all from Cornell. She is also the author of "Say Little Do Much": *Nursing, Nuns and Hospitals in the Nineteenth Century*. Maria Tassone is the inaugural director of the Centre for IPE. She is also the Senior Director, Interprofessional Education and Practice at the University Health Network in Toronto, and Assistant Professor in the Department of Physical Therapy, Faculty of Medicine, University of Toronto. Brian D. Hodges is Vice-President Education at the University Health Network, Professor of Psychiatry, Scientist at the Wilson Centre for Research in Education, and Richard and Elizabeth Currie Chair in Health Professions Education Research at the University of Toronto. He is the coauthor of *Creating the Health Care Team of the Future: The Toronto Model for Interprofessional Education and Care* and coeditor of *The Question of Competence: Reconsidering Medical Education in the Twenty-First Century*, both from Cornell. He is also the author of *The Objective Structured Clinical Examination*.
