**Paul LeSage, Jeff T. Dyar, Bruce Evans : Crew Resource Management: Principles And Practice** before purchasing it in order to gage whether or not it would be worth my time, and all praised Crew Resource Management: Principles And Practice:

1 of 1 people found the following review helpful. HORRIBLY written! (Good principles though)By Robert MurrellI really do like the concepts, principles and values that this textbook is trying to instill. I think the the Fire Service as a whole, and all its members, would benefit greatly from these ideas and principles that are portrayed in this book. HOWEVER!!!! This text book is poorly written, difficult to read at times and lacks presenting definitive information to actually apply certain principles presented .Also, i feel like throughout the textbook information is just constantly REPEATED over and over again. I feel like the book could have been condensed into about a quarter amount of pages, if only the info was not constantly repeated.1 of 1 people found the following review helpful. Case studyBy Kindle CustomerAwful. Needed this for a promotional test. A whole lot of case studies. Will never use this

info. Only read if you have to.0 of 0 people found the following review helpful. Five StarsBy Beth ThorntonSpecialty book for my son in fire department taking a promotions exam. Received quickly

All fire departments are designed to achieve objectives like minimizing the loss of life and property, but few departments that fail to emphasize crew resource management (CRM) principles on an ongoing basis succeed in getting the most out of its various teams to best achieve these goals. Crew Resource Management: Principles and Practice will teach fire department leaders the critical CRM skills needed to get the most out of every individual department member, and to create an entire organization dedicated to the philosophy that the whole is greater than the sum of its parts. Crew Resource Management: Principles and Practice will help fire department leaders to: eliminate communication barriers within various teams; improve the lines of communication between fire fighters and their superiors; maximize synergies between teams through cross-training while also improving individual performance; and teach situational awareness and decision making skills to help department members succeed in even the most challenging conditions.
