Bryan E. Bledsoe, Randall W. Benner : Critical Care Paramedic before purchasing it in order to gage whether or not it would be worth my time, and all praised Critical Care Paramedic:

1 of 1 people found the following review helpful. Its a textbook.By CarlIt is very "classic" text book style. You will learn extensive ins and out of the critical care paramedic, however if you have ever taken a college course where the instructor reads off the power point to you. Its about like that. A more interesting text I read in conjunction with this one was ASTNA Patient Transport: Principles and Practice.0 of 0 people found the following review helpful. Excellent book for Prehospital Critical CareBy Adam Thompson, EMT-PI am a big fan of Dr. Bledsoe's contributions to EMS. This book is an excellent product for those looking to learn about critical care transport. Critical care transport is certainly a different animal from everyday EMS. This book is perfect for the CCEMTP. This book has all the information you need, including ABGs and other lab values, ventilator education, drug infusion review, and flight

physiology. I highly recommend this publication!!!0 of 0 people found the following review helpful. GREAT!By
Cody AstonThis was just what I was looking for it couldn't be any better! This sell was on time and great to work with!

Critical Care Paramedic is the first and only book written for the expanding field of critical care transport. Utilizing the successful format of Bradys best-selling Paramedic Care: Principles Practice, this book is both written and extensively reviewed by leading experts in the field. This comprehensive book addresses all aspects of critical care transport including: operations, safety, advanced pharmacodynamics, advanced physiologic monitoring, advanced airway management, medical emergencies, trauma emergencies, organ donation, and other important areas of critical care. Critical Care Paramedic will be the industry standard for critical care paramedic education and available only from Brady.

About the AuthorDr. Bryan Bledsoe is an emergency physician with a special interest in prehospital care. He received his B.S. degree from the University of Texas at Arlington and his medical degree from the University of North Texas Health Sciences Center/Texas College of Osteopathic Medicine. He completed his internship at Texas Tech University and residency training at Scott and White Memorial Hospital/Texas AM College of Medicine. Dr. Bledsoe is board certified in emergency medicine and is an Adjunct Associate Professor of Emergency Medicine at The George Washington University Medical Center in Washington, D.C.
