**Richard A. Patterson, Christina D. Patterson : Critical Care Patient Transport, Principles Practice, 5th Edition** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Critical Care Patient Transport, Principles Practice, 5th Edition:

2 of 2 people found the following review helpful. OK outline/guide By S. Elrasoul Like many guides I cannot stress this enough, THIS IS A GUIDE NOT YOUR ONLY MEANS OF STUDY. This book is great for following along with the course material and for after you finish the course, it is by no means your only thing to read. I have to say though it is very useful and will help you get a better edge come test time. It helps better outline the chapters and the course material so you can get the information from that chapter faster but I do notice that it is not too detailed which again, you still want to read the chapter and learn everything. Even though it is not a review guide and more of an outline it is

a good book to have if you are taking the course to follow along with. Basically call this your workbook that goes along with the course and you will be pleased. Minus 2 stars for not being the best guide out there, not the best written outline, and same writing format (it made it plain and sour). CD is blah, good info but sounds like they just threw it in there without putting much effort in quality. 3 of 3 people found the following review helpful. Misleading on content  
By lenrnI bought this book to use as a study guide for the CFRN exam. It is pretty useless without the set of CD's since the book is in outline form. Unfortunately, someone would not realize they need the CD's until they bought the book. I was very disappointed and now have to find another book with the material I wanted and wasted \$60.00. They should sell the books and the CD's together so people are aware they go together  
8 of 8 people found the following review helpful. Poorly Formatted for the E-Book  
By M. PierettiUnfortunately, this book was a \$40 waste of money. I haven't read the actual Critical Care Patient Transport text, but the format of this e-book horrible and comes without a navigable table of contents. Publisher, please make amends!

We are an APPROVED FP-C REVIEW COURSE PROVIDER, and this textbook is used by our nationally recognized lecturers who present Review Courses for Certified Flight Registered Nurse (CFRN), Flight Paramedic-Certified (FP-C), Certification in Emergency Nursing (CEN), Critical Care Registered Nurse (CCRN), Certified Transport Registered Nurse (CTRN). In addition to being industry recognized leaders in their field, several of our lecturers are also Editorial members with the Air Medical Journal, having worked in the industry for a combined sixty years and have experience in Adult, Pediatric, Neonatal, Obstetric, Trauma, Emergency, and Critical Care. Our Instructors are also licensed by the Federal Aviation Administration (FAA) as Airplane and Helicopter rated Pilots. This book is sure to assist anyone wanting to expand their knowledge, better themselves clinically, or to prepare for any of these tough examinations. Also included are over 750 practice questions with answers and rationales, great illustrations, pneumonics, and tips of the trade. We also have a brand new 8 disc CD Audio Box Set which compliments this textbook nicely, as if you were sitting in the live class. Once purchased, a 16.5 hour continuing education certificate is available, approved by the Virginia Board of Nursing, Virginia Office of EMS, Board for Critical Care Transport Paramedic Certification (BCCTPC), and National Registry of EMT's. To take advantage of this special offer, email the Author once you order the book and review it thoroughly. A Final Exam will be emailed to you upon request, for a fee of \$20 to cover the CEU certificate and course approval number.

I recommend this text to anyone wanting to prepare for their CEN, CFRN, or CTRN exams, or for just honing their critical care knowledge. A MUST have for your library!!! -- --James Grove, ICU Manager  
Mr. Patterson has one of THE BEST reference books out there and helps prepare you for certification as a CEN, CFRN, CTRN, or FP-C. --  
Amanda Munoz, Flight Nurse  
This is the best Book I have seen thus far. I purchased this book 2 months prior to my certification exam and passed without any problems the first attempt. This was exactly what I needed to prep me for this exam, and without it, I may not have been focused enough to know where I was weak. --Alex Dominion, CCRN, CFRN  
About the Author  
In addition to being an Instrument rated Commercial Helicopter Airplane Pilot, Richard is also a Certificated Flight Instructor for Helicopters as well as an Advanced Instrument Ground Instructor. Richard has worked in Emergency Management and as a Flight Paramedic for the last 18 years. He has managed several air medical programs, has helped start two programs from the ground up, and worked as Base Supervisor for several CAMTS accredited rotor-wing programs. He is Instructor credentialed in BCLS, ACLS, PALS, ITLS, NRP, PEPP, PHTLS, ENPC, and EMT-Paramedic. Richard oversees the daily operations of Critical Care Concepts; a State approved ALS Training Agency with the Virginia Office of EMS, and has provided training programs in approximately 10 US States, as well as Canada, South America, Central America, and South Korea, in a multitude of areas. In addition to being a regular contributing writer for three air medical industry magazines, his work has also been published in various nursing and EMS journal publications. He is now on the Editorial Board with the Air medical Journal and also assisted with the new 2009 Mosby Paramedic textbook as a Chapter er.
