Wilbert M. Gesler, Robin A. Kearns : Culture/Place/Health (Critical Geographies) before purchasing it in order to gage whether or not it would be worth my time, and all praised Culture/Place/Health (Critical Geographies):

Culture/Place/Health is the first exploration of cultural-geographical health research for a decade, drawing on contemporary research undertaken by geographers and other social scientists to explore the links between culture, place and health. It uses a wealth of examples from societies around the world to assert the place of culture in shaping

relations between health and place. It contributes to an expanding of horizons at the intersection of the discipline of geography and the multidisciplinary domain of health concerns.
