Timothy J. McCulley MD : Curbside Consultation in Oculoplastics: 49 Clinical Questions before purchasing it in order to gauge whether or not it would be worth my time, and all praised Curbside Consultation in Oculoplastics: 49 Clinical Questions:

Are you looking for concise, practical answers to those questions that are often left unanswered by traditional texts and references in oculoplastics? Are you seeking brief, evidence-based advice for common clinical dilemmas or

complications? Curbside Consultation in Oculoplastics: 49 Clinical Questions provides quick and direct answers to the thorny questions most commonly posed during a curbside consultation between experienced clinicians. Dr. Robert C. Kersten and Dr. Timothy J. McCulley, have designed this unique reference in which oculoplastic specialists offer expert advice, preferences, and opinions on tough clinical questions commonly associated with oculoplastics. The unique QA format provides quick access to current information related to oculoplastics with the simplicity of a conversation between two colleagues. Images, diagrams, and references are included to enhance the text and to illustrate common clinical dilemmas. Curbside Consultation in Oculoplastics: 49 Clinical Questions provides information basic enough for residents while also incorporating expert pearls that even high-volume ophthalmologists will appreciate. Residents, fellows, and practicing physicians alike will benefit from the user-friendly and casual format and the expert advice contained within. Some of the questions that are answered: What do I do when a patient on anti-coagulants needs surgery? When does an eyelid lesion need to be biopsied? What are the general treatment guidelines for Graves ophthalmopathy? How should I treat bacterial orbital cellulitis? How do you distinguish an orbital infection from sterile inflammation? When should I be concerned about systemic disease in a patient with blepharoptosis? What are the oculoplastic uses of botulinum toxin? How do I know when to order an MRI or a CT?

The declared aim of this publication is to have a current, concise, credible, and clinically relevant book for the practicing ophthalmologist, presenting personal viewpoints of the authors. The contributors cover most controversial issues in an original and practical way in order to achieve the best patient care and outcome. They have succeeded in their endeavors, by creating an interesting and enjoyable book which will accurately reflect our current thinking and conceptions in the years to come. In my opinion, this book is one of the best publications of its type and is a real beacon of light. It is a great teaching tool, which a well-earned place in any ophthalmologists library. -D. Briscoe, Emek Medical Center, Graefe's Archive for Clinical and Experimental Ophthalmology
