on both sides of the border and provides insights into the health care systems of the US and Canada like few others can. If you really want to know how our health care system in the US compares to Canada's system, you must read this excellent book.

Henry P. Krahn, M.D. practiced urology for 38 years in Winnipeg, Canada, followed by eight years as a urologist with the Mayo Health Care System in Owatonna, Minnesota. Krahn compares and critiques the two nations' health care systems from a surgeon's unique perspective. His refreshing writing style cuts to the chase, required reading for citizens of both countries concerned about the state of their medical care. *Damaged Care* provides rare insight, candor, and a detailed prescription for improving the quality of the Canadian and American health care systems.
