**Robert T. Spalding : Death by Pedicure: the dirty secrets of nail salons** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Death by Pedicure: the dirty secrets of nail salons:

0 of 0 people found the following review helpful. Don't Die Just B/C You Want Your Feet To Look GoodBy fkurdiI'm in MediNail Learning Ctr taking the online courses to advance my knowledge as a Nail Technician in the state of NC. This book says it all...better be careful where you put your feet and what salon you use...you could die simply by getting a pedicure!2 of 2 people found the following review helpful. Excellent Resource for Nail TechsBy Little

Rumpkin I am a nail tech with many concerns about the lack of sanitation and safety in the nail industry. This book was my text book in the Advanced Nail Tech course offered by Medinails Learning Center, and taught by the author Dr. Spalding. The book is clear and concise, not heady. It is easy to understand, informative and thorough. The title has apparently changed to The Science of Pedicures. I like the first title better, catchy and gets to the point about health and safety. Every nail tech should read this book. 1 of 1 people found the following review helpful. All Pedicure Clients Should Pay Attention. By Robin Henagulph Could have covered the same ground within half the number of pages. Not laid out the best but still worthwhile reading AND doing something about the problems raised.

Death by Pedicure provides helpful hints on how to keep your feet and nails healthy and covers the full range of infections in the nail salon industry. It provides answers to questions like: What is the most dangerous instrument in a nail salon? What are the primary bacterial organisms responsible for infections? How many infections are estimated to occur yearly with manicures and pedicures in the United States? How can I protect myself from unsanitary nail salons or nail technicians? What are some foot and nail care products to avoid? Who controls the nail salon industry? How can nail technicians detect and refer foot problems before they become serious? Many states have a Failing Grade in disinfection safety protocols. See what YOUR STATE'S GRADE is.
