Charles Farabee : Death, Daring and Disaster: Search and Rescue in the National Parks before purchasing it in order to gage whether or not it would be worth my time, and all praised Death, Daring and Disaster: Search and Rescue in the National Parks:

3 of 3 people found the following review helpful. Great Outdoor BookBy Barbara270This is one of the best outdoor books I have read. It's very well written and researched. I had no idea that so many search and rescues took place. It's amazing that the same type of accidents kept taking place year after year. Whether you're reading this for research or

pleasure this won't let you down.0 of 0 people found the following review helpful. ... you're interested in national parks this is a very good book. It shows you you can't take things ...By d mitchellIf you're interested in national parks this is a very good book. It shows you you can't take things for granite, when you're in these parks you have to be aware of your surroundings. Example Yellowstone the Bears, moose, elk, and other types of animals this is not a petting zoo these are wild animals. However some people don't realize this and then they get into trouble.It tell stories of how the national Park Rangers assist visitors to these parks and how danger at times their jobs can be.14 of 14 people found the following review helpful. Get an inside story on what recently went wrong in OregonBy Chris Zee ShutterbugA somewhat dry accounting, using newspaper clippings whenever available, of mishaps that casual (and quite often very experienced)hikers encounter in what commonly is believed to be safe National Parks. A very quick education in being prepared for the underestimated dangers of dehydration, hypothermia, and heat stress. It is not quite as good as "Over the Edge: Death in Grand Canyon"or "Death in Yellowstone: Accidents and Foolhardiness in the First National Park", both of which manage to get the message of being careful across in a much more narrative style. If you enjoy "Weather stories" on TV, these will all make for fascinating reading.PS In the Oregon reference I am talking about the death of CNET editor James Kim, who left the relative safety of his car trying to get help for his family, and the three climbers on Mt Hood that perished shortly after. You will learn of countless expeditions that people insisted on undertaking because they were already there, even though the weather has changed drastically.

375 exciting teales of heroism and tragedy drawn from the nearly 150,000 search and rescue missions carried out by the National Park Service since 1872.

About the AuthorButch Farabee recently retired as assistant superintendent of Glacier National Park. The author of National Park Ranger, he lives in Tucson, Arizona
