**Richard LeBlond, Richard DeGowin, Donald Brown : DeGowin's Diagnostic Examination** before purchasing it in order to gage whether or not it would be worth my time, and all praised DeGowin's Diagnostic Examination:

you can never have it both ways... comprehensive and full of pictures... anyways, I love the book so far, only flaw is I wish they had key lab values to go along with certain diseases so you could correlate your exam with a cellular disease mechanism... but I guess that's what med school is for... overall great book... A perfect addition to Bates... I have only just purchased it so I do not know how many inaccuracies, but from the format I assume the authors are thoughtful and dedicated and errors will be far and few between. Enjoy!
