helpful. Program 1 to 14 on DVD By W. Larson. Let's skip the hype! Delmar Learning would lead you to believe that programs 1 to 14 can be found online now. My wife is a nursing student working on her masters and we purchased this for her but found a used copy for \$1800 so I am selling the new UNUSED set. The DVD set has more information and has a broader coverage of this material than can be found online or even in the basic text books as it brings all the parts together in one easy to use format. This series focuses on the administrative and clinical skills that medical assistant learners will need in the workplace. Learners will seek to utilize this and Delmar Cengage Learning's Critical Thinking for Medical Assistants DVD series to ensure that they are covering the "procedural/show me" and the "critical thinking/analytical" approach to working as a medical assistant in the medical office. Most of the DVD set we sell of program 1 to 14 are sold to colleges or professors who then charge you the student a class fee to watch them. Sadly they don't allow you to copy it and take it home to study with a set of your own you can watch it over and over again and refresh yourself on the critical thinking needed. Find learning solutions to boost your career, augment your curriculum, improve your training courses or help you master new skills, from the leader in skills based solutions for educational institutions, businesses, and professionals? Delmar, a part of Cengage Learning. We give this DVD set the highest rated marks we can. Not a week goes by when the student gather at our home on Saturdays to watch over the past week of class work and in hospital studies. As if that wasn't enough here's what their professors had to say about this DVD set they have for class study - Professor ***** Solener of the united health and science department said: "this is by far a 10 star rated program by Delmar cengage - I have been using it as part of my class for the past several years and would without a doubt in my mind buy it again and plan to in 2012 when the update comes out" Professor ***** Mankiny (same college) "10 out of 10 - Very helpful, informative, and up to date as of 2010 maybe not for the average student but helpful for any professor or university teaching the course it covers." Carol ***** head of HIPAA compliance at the above college "The highlights showing what medical assistants will need to know and pay close attention to for daily working is a added value. We spend countless hours providing training on HIPAA regulations for those working with patients and those working with confidential information costing the college a lot of resources and time and money" Real world testimonials throughout the complete DVD set for realistic and pertinent information. MSRP: \$2990.00

This fourteen program DVD series is now available online! This series focuses on the administrative and clinical skills that medical assistant learners will need in the workplace. Learners will seek to utilize this and Delmar Cengage Learning's Critical Thinking for Medical Assistants DVD series to ensure that they are covering the "procedural/show me" and the "critical thinking/analytical" approach to working as a medical assistant in the medical office.
