Sheryl Whitlock : Delmar's Clinical Lab Manual Series: Immunohematology (Clinical Laboratory Manual) before purchasing it in order to gage whether or not it would be worth my time, and all praised Delmar's Clinical Lab Manual Series: Immunohematology (Clinical Laboratory Manual):

A new addition to Delmar's Clinical Laboratory Manual Series, this lab manual presents students with hands-on procedures used in blood banking, including manual cell working, typing, screening and cross-matching. Step-by-step exercises throughout illustrate important concepts in transfusion practice and make this manual ideal for medical laboratory technicians and technologists. Essential coverage of genetics, immunology and hematology are included to

promote understanding of these topics. The book is designed to make even the most difficult blood bank topics accessible. (transfusion, typing, sample, compliance, Allied Health, immunology, hematology, MLT, transfusion, immunohematology, lab manual)

About the Author Sheryl Whitlock is an Associate Professor in the Medical Laboratory Technician Program at Montgomery County Community College in Blue Bell, PA. She is certified with the American Society of Clinical Pathologists and the National Certification Agency for Medical Laboratory Personnel. In addition, she also is an instructor for TIPS (Teaching Improvement Project Systems) workshops and the evening division at Gwynedd Mercy College. Sheryl has written an article in the Immune Inquirer that is affiliated with the Penn Jersey American Red Cross.
