**From Krishnamoorthy Ennapadam S Prince Martin J : Dementia: A Global Approach** before purchasing it in order to gage whether or not it would be worth my time, and all praised Dementia: A Global Approach:

Growth in the incidence of dementia presents major challenges to global healthcare systems. As the burden of dementia in non-Western cultures grows, developing nations are expected to overtake developed nations in terms of dementia prevalence. Insights from developing nations and transcultural considerations are, nevertheless, neglected in

the published literature. *Dementia: A Global Approach* fills this gap by integrating contemporary cross-cultural knowledge about dementia. Each section reviews the literature from the published, predominantly Western, perspective, contrasting it with empirical knowledge from non-Western cultures. Covering major clinical, epidemiological and scientific areas of interest, detailed consideration is also given to care-giving models across the world and management of patients who have migrated between regions. Enriched with personal insights from clinical experts across the globe, this is a key text for neurologists, geriatricians, psychiatrists, psychologists, epidemiologists and all those responsible for managing provisions of dementia services.

About the Author Ennapadam S. Krishnamoorthy is Director and T. S. Srinivasan Chair, The Institute of Neurological Sciences, VHS Hospital, Chennai, India. Martin J. Prince is Professor of Epidemiological Psychiatry at the Institute of Psychiatry, London, UK. Jeffrey L. Cummings is Augustus Rose Professor of Neurology, Professor of Psychiatry and Biobehavioral Sciences, Director of the UCLA Alzheimer's Disease Center and Director of the Deane F. Johnson Center for Neurotherapeutics, David Geffen School of Medicine, UCLA, Los Angeles, California, USA.
