The field of cost-effectiveness analysis has lacked an entry-level textbook until now. *Designing and Conducting Cost-Effectiveness Analyses in Medicine and Health Care* is a hands-on guide for conducting economic analyses that closely follows the recommendations of the Panel on Cost-Effectiveness in Health and Medicine. Step by step, Dr. Muennig outlines the theory and practice of cost-effectiveness and shows how to develop an original research question, retrieve data, design a decision analysis tree, calculate quality-adjusted life years, and test for error in analysis. The book provides clear and detailed instruction and includes a review of the epidemiological and biostatistical skills students need to conduct cost-effectiveness analyses. While the book is designed for students, it includes advanced topics for policymakers, community health experts, and preventive medicine residents who are interested in the field. The book uses a worked example to walk the reader through the process of designing and conducting an analysis and provides links to all of the major Internet-accessible sources of government data. This book will be a welcome addition to the library of students and seasoned researchers alike.

"?strongly recommended for those individuals interested in a basic presentation of applied cost-effectiveness analysis and cost-utility analysis in health technology assessment?"(Journal of Drug Assessment, No.5, 2002) "Dr. Muennig has written a highly accessible guide to cost-effectiveness analysis that bridges the latest theoretical developments with pragmatic instruction, informative examples, and even tips for online data sources. Students and professionals alike will benefit from the step-by-step clarity with which Dr. Muennig presents and dissects the complex methods that underlie this increasingly important tool for rational decision making in medicine and health policy." --Marianne C. Fahs, associate professor and director, Health Policy Research Center, Milano Graduate School of Management and Urban Policy, New School University, New York
