Linda S. Fazio Ph.D. OTR FAOTA : Developing Occupation-Centered Programs for the Community (2nd Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Developing Occupation-Centered Programs for the Community (2nd Edition):

0 of 0 people found the following review helpful. Five StarsBy Customeranother school book and it was very good0 of 0 people found the following review helpful. Program Development Heaven!By Toni ThompsonWorld's greatest resource for program development!0 of 0 people found the following review helpful. This is a great bookBy Priscilla WuDr. Fazio is awesome, and this book is great for developing programs. I highly recommend it for occupational therapists who are considering program development in the community!

Patient/client care is swinging away from the institution and into the community. This is true not only for occupational therapy but also for many health care providers. Just as mental health and illness and the concerns of humane care established the origins of occupational therapists, these same concerns have ushered a return to the community as a favored site for practice. The text covers building a foundation within a community, program development, program evaluation and program examples for children, adolescents and adults.

About the Author Linda S. Fazio received the 1999 Occupational Therapy Association of California Award of Excellence for significant contributions to occupational therapy. She holds a Ph.D. in Higher Education Administration, Student Services and Counseling from the University of North Texas as well as an MS in Anthropology from the University of Wisconsin-Milwaukee and a BS in Occupational Therapy from Texas Woman's University. She consults widely on occupational therapy academic curriculum development, curriculum design, and community program design and development.
