**Karla Zadnik OD PhD, Joseph T. Barr OD MS : Diagnosis, Contact Lens Prescribing, and Care of the Keratoconus Patient, 1e (Clinical Practice in Contact Lenses)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Diagnosis, Contact Lens Prescribing, and Care of the Keratoconus Patient, 1e (Clinical Practice in Contact Lenses):

2 of 2 people found the following review helpful. so close!By A. BissellI went to a lecture by Dr. Barr (one of the authors), and he discussed this book. I find it to be very general, and to be a good review of keratoconus information. There's not much about actually fitting keratoconus patients, as far as choosing base curves, lens types, etc.Decent, but not as specific as I would like.1 of 12 people found the following review helpful. needs to spell keratoconus correctly in the title!By rllavallee@hotmail.comGood to see a book covering this topic even though I've yet to read it

Keratoconus is a developmental problem in which the central portion of the cornea becomes thinner and bulges forward in a cone-shaped fashion. Correction is usually best achieved with contact lenses, but if these cannot be worn or if the condition is severe, a corneal transplant is carried out. This compact manual gives the most current clinical findings for management of keratoconus patients.\* Comprehensive source for the contact lens practitioner on the management of keratoconus \* The most recent clinical findings for management of keratoconus in a single source \* Drs. Zadnik and Barr are internationally recognized experts on keratoconus
