**Reinhard Busse, Alexander Geissler, Wilm Quentin, Miriam Wiley : Diagnosis-Related Groups in Europe (European Observatory on Health Systems and Policies)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Diagnosis-Related Groups in Europe (European Observatory on Health

## Systems and Policies):

Diagnosis Related Group (DRG) systems were introduced in Europe to increase the transparency of services provided by hospitals and to incentivise greater efficiency in the use of resources invested in acute hospitals. In many countries, these systems were also designed to contribute to improving – or at least protecting – the quality of care. After more than a decade of experience with using DRGs in Europe, this book considers whether the extensive use of DRGs has contributed towards achieving these objectives. Written by authors with extensive experience of these systems, this book is a product of the EuroDRG project and constitutes an important resource for health policy-makers and researchers from Europe and beyond. The book is intended to contribute to the emergence of a ‘common language’ that will facilitate communication between researchers and policy-makers interested in improving the functioning and resourcing of the acute hospital sector. The book includes:

- A clearly structured introduction to the main ‘building blocks’ of DRG systems
- An overview of key issues related to DRGs including their impact on efficiency, quality, unintended effects and technological innovation in health care
- 12 country chapters - Austria, England, Estonia, Finland, France, Germany, Ireland, the Netherlands, Poland, Portugal, Spain and Sweden
- Clearly structured and detailed information about the most important DRG system characteristics in each of these countries
- Useful insights for countries and regions in Europe and beyond interested in introducing, extending and/ or optimising DRG systems within the hospital sector

About the Author Reinhard Busse is Professor and Head of the Department of Healthcare Management at Berlin University of Technology, Germany. Alexander Geissler is a research fellow in the Department of Health Care Management at Berlin University of Technology, Germany. Wilm Quentin is a research fellow in the Department of Health Care Management at Berlin University of Technology, Germany. Miriam M. Wiley is Professor and Head of the Health Research and Information Division at the Economic and Social Research Institute in Dublin, Ireland. Series Editors Josep Figueras is Head of the Secretariat and Research Director of the European Observatory on Health Systems and Policies and Head of the European Centre for Health Policy, World Health Organization Regional Office for Europe. Martin McKee is Research Director of the European Observatory on Health Systems and Policies and Professor of European Public Health at the London School of Hygiene Tropical Medicine as well as a co-director of the ‘European Centre on Health of Societies in Transition.
