World Health Organization : Diet, Nutrition and the Prevention of Chronic Diseases: Report of a Joint WHO/FAO Expert Consultation (WHO Technical Report Series) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Diet, Nutrition and the Prevention of Chronic Diseases: Report of a Joint WHO/FAO Expert Consultation (WHO Technical Report Series):

This report examines the science base of the relationship between diet and physical activity patterns and the major nutrition-related chronic diseases. Recommendations are made to help prevent death and disability from major nutrition-related chronic diseases. These population, nutrient-intake, and physical activity goals should contribute in the development of regional strategies and national guidelines to reduce the burden of disease related to obesity, diabetes, cardiovascular disease, several forms of cancer, osteoporosis, and dental disease. The recommendations contained in this report are based on the examination and analysis of the best available evidence and the collective judgment of a group of experts from WHO and FAO (Food and Agriculture Organization).
