Each edition gets better and better...By CarolThis handbook provides comprehensive discussion and resources of systems approaches to medical nutrition therapy. This reference targets graduate nutrition students, dietetic interns, and practicing dietitians. This reference easily incorporates the Nutrition Care Process for parenteral and enteral nutrition based on 2008 Commission on Accreditation of Dietetic Education Standard II and is updated to reflect changes from the 2011 edition of the International Dietetics and Nutrition Terminology. Each aspect of nutrition care is covered with foundational and refereed resources. It is well worth having this in any professional library.0 of 0 people found the following review helpful.
