Barbara Odom-wesley : Documentation for Medical Records before purchasing it in order to gage whether or not it would be worth my time, and all praised Documentation for Medical Records:

1 of 1 people found the following review helpful. Old BookBy Renee G. McgeeOrdered this book for my Health Record Content class but school switched to another AHIMA approved text. Now I see why. Alot of the information is outdated according to the new era of Electronic Health Record. Missing alot of important info needed to teach anyone about EHR. Good for paper medical records but how long will they exist? Until October 2014.2 of 2 people found the following review helpful. Health Information DocumentationBy Manoj VargheseDocumentation for Medical Records, product of AHIMA is best choice for practical approach.Makes deficiency check easy and know more about different types of form used in an hospital set up.0 of 0 people found the following review helpful. Five StarsBy ZABRINA ELIZONDOGreat price!

Replaces Documentation for Acute Care, AB100704 The most respected resource for medical records documentation, Documentation for Medical Records is expertly revised and expanded for relevance to many healthcare settings. This book offers a practical orientation and overview of what health information management (HIM) and allied health students will encounter as they enter the healthcare profession. Content is organized for effective classroom use, meeting educator requirements and optimizing student learning. An insightful introduction to industry policies, procedures, and regulations that impact medical record documentation is also delivered. Key Features: Outlines basic healthcare documentation principles Addresses transition to electronic records Incorporates documentation for acute care as the practice model Covers documentation in ambulatory, home and hospice, behavioral, and long-term care settings Instructor guide available online CD with additional resources included About the Authors Barbara Odom-Wesley, PhD, RHIA, FAHIMA, is chair of the HIT Program at DeVry University, and is an HIM executive and consultant. Diann Brown, MS, RHIA, CHP, is an experienced HIM executive with a background in a variety of healthcare settings, and is a noted author and speaker on HIM topics. Chris L. Meyers, RHIA, is president of eCatalyst Consulting, a consulting firm specializing in the design and implementation of HER systems, eDiscovery and legal holds, and legal health records. She has extensive knowledge in implementing HER systems and is recognized nationally as a leader in HIM transformation.
