Crystal Gateley PhD OTR/L, Sherry Borcharding MA OTR/L : Documentation Manual for Occupational Therapy: Writing SOAP Notes before purchasing it in order to gage whether or not it would be worth my time, and all praised Documentation Manual for Occupational Therapy: Writing SOAP Notes:

2 of 2 people found the following review helpful. Documentation Manual For Occupational TherapyBy A D.Like this book better than the other I purchased simply because it is more in depth. I am revisiting information I learned but in a way that is clicking with my brain. Since I am on clinicals and documentation is not making sense to me- this is vital to my passing the class.0 of 0 people found the following review helpful. overpriced and would be nice to have soap notes for different settings such as ...By just another friendly personoverpriced and would be nice to have soap notes for different settings such as acute. The answers are in the back of the book and I find that helpful. The book shows

examples of poor, average, better, and much better documentations. I have to highlight the better examples so I can quickly read them for review instead of accidentally using a poor example and to save time. 10 of 10 people found the following review helpful. AmazingBy ebrink This documentation book is extremely helpful and I highly recommend it! I feel that this is a great book for new documenters. It provides multiple ways to learn, using worksheets and cheat sheets for you to use on daily basis.

As the practice of occupational therapy evolves, so too should the resources that aid clinicians, faculty, and students in learning and achieving the skill of effective documentation. Documentation Manual for Occupational Therapy: Writing SOAP Notes, Third Edition is designed to provide each part of the documentation process, while the worksheets are designed to let you practice each step as you learn it. Crystal A. Gateley and Sherry Borcharding take the Third Edition and broaden the scope of the text to include SOAP notes relevant to pediatric practice, driving assessment, balance, assistive technology, positioning and mobility, and other practice settings. Additionally, the authors have introduced in this updated edition, the COAST method of goal writing that emphasizes client-centered and occupation-based intervention and documentation. Also included in the Third Edition, new online instructor's material that includes videos, scenarios, corresponding documentation, sample grading rubrics, and assignments. As in the previous editions, Documentation Manual for Occupational Therapy: Writing SOAP Notes, Third Edition focuses specifically on documentation of client performance in occupational therapy practice. The proven "how to" strategy of this workbook translates the SOAP note process into a step-by-step sequence. Features of the Third Edition include:

- Worksheets designed to practice individual skills as well as the entire SOAP note process
- New chapter on reimbursement, legal, and ethical consideration
- New chapter on general guidelines for documentation
- Instructor's material that includes videos, scenarios, corresponding documentation, sample grading rubrics, and assignments
- Additional on-line resources available with new book purchase
- Current information including AOTA's Centennial Vision, the Occupational Therapy Practice Framework: Domain Process, 2nd Edition, and other AOTA Official Documents.

Instructors in educational settings can visit www.efacultyounge.com for additional material to be used for teaching in the classroom. Documentation Manual for Occupational Therapy, Third Edition presents essential documentation skills that all occupational therapy clinicians, faculty, and students will find critical for when assessing, treating, and offering the best evidence available for their clients.

"In this new edition, there is an additional focus on all areas of documentation, not just SOAP notes, including chapter 4's general guidelines for documentation. This book was primarily designed to help with one important aspect of clinical instruction: teaching documentation. Thus, it is mostly for educators and students but can be a valuable addition to a department receiving students on placement or for therapists wanting to improve their documentation skills." - Paulette Guitard, Canadian Journal of Occupational Therapy
