Angela Baeten PT, Michael L. Moran ScD PT, Lynn Phillippi MS PT : Documenting Physical Therapy: The Reviewer Perspective, 1e before purchasing it in order to gauge whether or not it would be worth my time, and all praised Documenting Physical Therapy: The Reviewer Perspective, 1e:

Documenting Physical Therapy provides practitioners with the tools necessary to make documentation a successful and beneficial part of clinical practice. Using the reviewer's perspective, emphasis is placed on documenting components that are essential for coverage determinations.

Will not use not appropriate for focus of course. Would be more applicable to more advanced course after students have had some clinical exposure. Elspeth Finch, McMaster University, writes: "It is not suitable for our program

because of the focus on documenting to meet the requirements of managed care, which is not a major focus in Canadian health care." The book is more for enhancing documentation than for teaching basics to P.T.A students. For a personal reference I feel it is excellent. Well organized and well written easily referenced. From the Publisher The introduction examines both what data the reviewer seeks and what the reviewer often finds to be insufficient in the documentation presented. Practical suggestions for effective and functional documentation are discussed. Case studies are utilized to compare poor documentation to improved documentation. About the Author Angela Baeten: P.T., Reimbursement Consultant Director, MJ Care, Inc., Racine, Wisconsin Michael L. Moran: Sc.D., P.T., Associate Professor, Department of Physical Therapy, College Misericordia, Dallas, Pennsylvania Lynn Phillippi: M.S., P.T., Former Vice President, Career Development, MJ Care, Inc., Racine, Wisconsin
