Mitchell Scheiman OD FCOVD FAAO, Maxine Scheiman, Stephen G. Whittaker PhD FAAO OTR/L CLVT : Low Vision Rehabilitation: A Practical Guide for Occupational Therapists before purchasing it in order to gage whether or not it would be worth my time, and all praised Low Vision Rehabilitation: A Practical Guide for Occupational Therapists:

0 of 0 people found the following review helpful. Good BookBy SweetestjoyI'm not an OT, but I am a teacher who works with vision students. This has provided me with good information and also helps me guide the OT's that do work with my students.3 of 3 people found the following review helpful. Low Vision Rehab BookBy RenaeThis book

is great for background information and has a lot of information on various eye diseases and conditions. It is a nice book to refer back to but not sure if it's easy to follow if your looking for specific treatment approaches. You would have to read a lot to find treatment options.0 of 0 people found the following review helpful. Five StarsBy Deborah RuffinExcellent book...Thanks

Low vision rehabilitation is rapidly growing as a specialty practice for occupational therapists. This growth requires practical, evidence-based information on the evaluation and treatment of the effects of low vision on occupational performance. Responding to this need, *Low Vision Rehabilitation: A Practical Guide for Occupational Therapists* blends standards of practice that have been developed over 50 years by low vision therapists and optometrists, with the latest scientific research and the unique perspective of occupational therapists. *Low Vision Rehabilitation* presents an emerging model in which occupational therapists practice as part of a team of vision rehabilitation professionals serving adults with low vision. Occupational therapists offer a unique contribution to the vision rehabilitation team, with a focus on meaningful occupational goals, the incorporation of occupation into therapy, and the orchestration of environmental, social, and non-visual personal factors into a treatment plan. Mitchell Scheiman, Maxine Scheiman, and Stephen Whittaker have developed a practical and straightforward text outlining an evaluation approach to interventions that focus on recovering occupational performance in adults. Special features Incorporates concepts from the AOTA Occupational Therapy Practice Framework: Domain and Process Provides most of the core knowledge required for the ACVREP low vision certification examination and AOTA specialty certification in low vision Includes an occupational therapy vision rehabilitation evaluation consisting of four components: occupational profile/case history, evaluation of visual factors, environmental evaluation, evaluation of occupational performance Emphasizes intervention and low vision rehabilitation treatment including modification of the environment, use of non-optical assistive devices, use of optical devices, and use of computer technology Provides valuable information on how to start an independent practice in low vision rehabilitation Includes chapters on diabetic management and electronic assistive technology Includes access to a companion website with printable forms and additional resources with text purchase Written by authors who are optometrists, occupational therapists, researchers, and certified low vision therapists (CLVT), *Low Vision Rehabilitation* employs an interdisciplinary perspective that is unique, practical, and credible.

Each section is full of information supported by research and practical experience. Appendices provide relevant resource material for those venturing into this area of practice. The content is very detailed and helpful in setting the stage for the work of the low vision therapist and for how an occupational therapist can fit into this practice area. This is a very comprehensive practice guide for occupational therapists encountering low vision clients who need help to address the issues from a low vision rehabilitation perspective or understand what is happening physically and psychologically. Marie Gage, *Canadian Journal of Occupational Therapy*
