Robert L. Wilkins PhD RRT FAARC, John E. Hodgkin MD, Brad Lopez MS RRT : Lung and Heart Sounds Online (Access Code), 1e before purchasing it in order to gauge whether or not it would be worth my time, and all praised Lung and Heart Sounds Online (Access Code), 1e:

Helping you develop skills in the accurate assessment of a patient's heart and lungs, Lung and Heart Sounds Online shows how to identify abnormalities in order to provide positive patient outcomes. Online modules include 42 lung and heart sounds using narrated animations and audio to enhance your understanding of chest auscultation. Case studies allow you to practice auscultation and diagnostic skills in a safe online environment. Developed by John Hodgkin and Brad Lopez, Lung and Heart Sounds Online lets you hear medical conditions as you would on the job. Over 50 normal and abnormal lung and heart sounds, many with narration and visuals, help you learn the lung and heart sounds that may be encountered in the clinical setting. Interactive exercises include labeling, matching, image

association, fill-in, and more, with immediate feedback provided. Animations and audibles simplify difficult concepts. Case Study capstone module offers real-world practice of auscultation and diagnostic skills as well as clinical data for each case patient. An Audio Library of the lung and heart sounds in the course provides an opportunity to listen and learn. A separate tab at the top of each screen allows easy access to all lung and heart sounds at any point during the course. Activity Only and Media Only links let you choose the type of learning you prefer. Audio glossary of key terms and definitions may be accessed at any point during the course. End-of-module exams are automatically scored and reported to your instructor's grade book.
