Roger Kropf, Guy Scalzi : Making Information Technology Work: Maximizing the Benefits for Health Care Organizations before purchasing it in order to gage whether or not it would be worth my time, and all praised Making Information Technology Work: Maximizing the Benefits for Health Care Organizations:

A book for senior executives, managers and clinicians that covers the before, during and after stages of a health care information technology (IT) project and provides guidance on how projects can be successfully managed. It shows readers how to assess IT project value before approval, monitor whether projects are on-time and on-budget, and measure performance after implementation. Case studies and effective project management tools and techniques help readers maximize project benefits. Kropf and Scalzi take a three-part approach that makes it easy for non-IT executives and managers to assess a project's development from start to finish.

...an excellent resource covering all the bases ... a must read for CEOs, CFOs, and COOs in health care. --George A. Vecchione, President and CEO, Lifespan, Providence, RI
An incredibly useful how-to book that fits the needs of multiple levels of the organization. Readable and useful for both the generalist and the IT expert in analyzing whether to invest in a program as well as measuring outputs. --Bruce Schroffel, President and CEO, University of Colorado Hospital, Aurora, CO...gives health care managers the logic and structure they need to achieve successful IT implementations...provides tools valuable to those who need to bring projects in on time, on budget, and on target. --Alexander Szafran, Director, Radiology Services, Maine Medical Center, Portland
