From Churchill Livingstone : Management of Chronic Conditions in the Foot and Lower Leg, 1e before purchasing it in order to gage whether or not it would be worth my time, and all praised Management of Chronic Conditions in the Foot and Lower Leg, 1e:

Bridging the gap between undergraduate and postgraduate knowledge and experience, this new full colour resource uses an interdisciplinary approach to help manage chronic conditions ndash; osteoarthritis, Achilles tendinopathy, gout, rheumatic diseases, forefoot/rearfoot entities, stress fractures/reactions, cerebral palsy ndash; in the lower limb and foot. Each chapter includes sections on predisposing factors, diagnosis, impairments, function, quality of life and management strategies while highlighting any complex features of a condition which may present. The latest advances are discussed with suggestions for new paths of research ndash; lsquo;future directionsrsquo;. The text is further supported by additional commentaries from internationally renowned researchers who highlight the key elements of

the work and provide a supplementary perspective of the particular clinical condition. A general view of the patient's needs is offered throughout, connecting clinical realities to real-world patient experiences. Management of Chronic Conditions in the Foot and Lower Leg is a comprehensive, practical tool that can be used to inform daily decision making in practice as well as to support those who build policy and management strategies in the clinical areas covered. "...this book is able to give a very detailed 'gold standard' education for the covered conditions." Reviewed by Tobias Bremer on behalf of In Touch, July 2015 Clear content and structure supported by full colour illustrations Includes less discussed conditions such as gout and cerebral palsy Focus on pain, impairment, function, quality of life and management strategies Critical reflections by experts highlight current clinical practice and thinking in research Provides a sound interpretation of research findings Features patient-reported outcome measures and health related behaviour strategies

"Written by a stellar line up of experts in their field. The book takes the reader on a very informative and detailed journey through many foot entities and everything from aetiology, risk factors, imaging, physiotherapy and pharmacology is covered for each." ed by Tobias Bremer on behalf of In Touch, July 2015 "There really are no competitors for this book. There is certainly no shortage of books covering the subjects this one does, but not in the same multidisciplinary, research-supported style. Recommended! -Martin C. Yorath, DPM (Rosalind Franklin University of Medicine and Science) for Doody's Service
