From Churchill Livingstone : Management of Chronic Musculoskeletal Conditions in the Foot and Lower Leg E-Book before purchasing it in order to gauge whether or not it would be worth my time, and all praised Management of Chronic Musculoskeletal Conditions in the Foot and Lower Leg E-Book:

Bridging the gap between undergraduate and postgraduate knowledge and experience, this new full colour resource uses an interdisciplinary approach to help manage chronic conditions such as; osteoarthritis, Achilles tendinopathy, gout, rheumatic diseases, forefoot/rearfoot entities, stress fractures/reactions, cerebral palsy such as; in the lower limb and foot. Each chapter includes sections on predisposing factors, diagnosis, impairments, function, quality of life and management strategies while highlighting any complex features of a condition which may present. The latest advances are discussed with suggestions for new paths of research such as; 'future directions'. The text is further supported by additional commentaries from internationally renowned researchers who highlight the key elements of

the work and provide a supplementary perspective of the particular clinical condition. A general view of the patient's needs is offered throughout, connecting clinical realities to real-world patient experiences. Management of Chronic Conditions in the Foot and Lower Leg is a comprehensive, practical tool that can be used to inform daily decision making in practice as well as to support those who build policy and management strategies in the clinical areas covered. Clear content and structure supported by full colour illustrations Includes less discussed conditions such as gout and cerebral palsy Focus on pain, impairment, function, quality of life and management strategies Critical reflections by experts highlight current clinical practice and thinking in research Provides a sound interpretation of research findings Features patient-reported outcome measures and health related behaviour strategies
