As the book explains, private companies main goal is to maximize profits. Other than that, the book is great. I ordered this book for a class in Government Finance. Although I have only read 2 chapters, I have found the information extremely insightful. The book's explanations and information assist the reader in understanding the intricacies of revenue and expenditures.2 of 2 people found the following review

helpful. Great ReadingBy Rock A. CantuGreat reading for anyone taking public administration classes or for that matter anyone interested in how our government works. Extremely candid and real. Prompt service and quick delivery.0 of 0 people found the following review helpful. Five StarsBy Willbaldo MolinarIt contains a wealth of knowledge

Management Policies in Local Government Finance, Sixth Edition is the latest edition in the classic ICMA Green Book series and is the 2012 comprehensive update to Managing Policies in Local Government Finance, Fifth Edition (2004). Published at a time when the slow pace of economic recovery and continuing reductions in state and federal assistance make it clear that local governments will need to fend for themselves for at least the next decade. As the status quo no longer works, innovation, creativity, and politically risky choices will be the only ways for local governments to maintain a balance between the fiscal challenges confronting them and responsiveness to their citizens' demand for services. In light of this reality, once again, our need for strong leadership in financial management has never been greater. Management Policies in Local Government Finance, Sixth Edition offers the up-and-coming chief financial officer a thorough grounding in all the principles of financial management, as well as a review of the financial policies and practices used by local governments in the United States today. The sixth edition takes a broader, more comprehensive approach rooted firmly in an understanding that the principal challenges of contemporary financial management are: \*\* Executing, evaluating, and, when necessary, changing existing financial policies and procedures \*\* Anticipating and, where appropriate, ameliorating conflict over future decisions \*\* Presenting complex financial information to different stakeholders in intuitive, simple, and comprehensive ways \*\* Understand debt management and bond sales \*\* Deciding when and how to engage new stakeholders in the financial management process.
